

**EPD**<sup>®</sup>

## ZALETY

- Szeroki wybór standardowych wymiarów
- Zoptymalizowany, stożkowy kształt kieszeni dla najlepszego przepływu powietrza
- Solidna, metalowa rama
- Niski początkowy spadek ciśnienia
- Płaska charakterystyka spadku ciśnienia

|                                          |                                                                                            |
|------------------------------------------|--------------------------------------------------------------------------------------------|
| <b>Zastosowanie</b>                      | w instalacjach wentylacji i klimatyzacji oraz jako filtry wstępne dla pomieszczeń czystych |
| <b>Rama</b>                              | blacha ocynkowana                                                                          |
| <b>Materiał filtracyjny</b>              | włókno szklane                                                                             |
| <b>Wymiary</b>                           | powierzchni czołowej filtrów wg PN-EN 15805:2010                                           |
| <b>Maksymalny przepływ</b>               | 1,25 x nominalny przepływ                                                                  |
| <b>Maksymalna temperatura pracy (°C)</b> | 70°C                                                                                       |
| <b>Maksymalna wilgotność względna</b>    | 100%                                                                                       |
| <b>System mocowania</b>                  | ramy montażowe typu 4MPS i obudowy FC-HF / FKDA                                            |
